Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3, 6, 8, 9, 11, 14, 15, 16, 18, 21, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ritter, U. S. patent 5,217,056 in view of Dilday et al., U. S. Patent 6,484,940. Ritter teaches pouch type holder having front 1 and rear 12 cover connected around three side edges to form a pocket having an opening. The pouch also has an opening 23 adapted to receive clip 21 and strap 22. The pouch is adapted to hold a memory-encoded card such as a credit card. Ritter also teaches a raised portion 14 on the rear piece 12 which acts as a securing element to hold the card back after it is inserted in the receiving space and guarantees that the inserted card will not slip out. (Column 3, line 34-42). Ritter does not teach an optical memory encoded card.

Dilday et al. teaches a data storage card having optical and magnetic data storage regions. The optical data tracks are read by a CD or DVD drive. It would have been obvious to one having ordinary skill in the art at the time this invention was made to construct the credit card pouch taught by Ritter to hold the credit card with magnetic

and optical memory taught by to provide a means to protect the magnetic and optical memory regions for damage.

Response to Arguments

2. Applicant's arguments with respect to claims 1, 9, and 16 have been considered but are moot in view of the new ground(s) of rejection.

The declaration filed does not overcome the rejection of claims because the U. S. Patent application Publication 2002/0027837 to Weber was not used in a rejection.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
